DETAILED ACTION

1. The examiner acknowledges the Remarks received 22 May 2007. Claims 1-40 are pending.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
3. Authorization for this examiner's amendment was given in a telephone interview with Daniel Chapik on 27 July 2007.
4. The application has been amended as follows:

In the claims:

Claim 15, line 6, immediately after "an antenna connector;" --;-- was deleted

Double Patenting

5. Applicant's arguments, see "Remarks," filed 22 May 2007, with respect to claims 1-3 and 4-15 of application number 11/097,682 have been fully considered and are persuasive. The provisional rejection of claims 1-3 and 4-15 has been withdrawn.

Oath/Declaration

6. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.
7. The oath or declaration is defective because: Specifically, a corrected statement should read, "I acknowledge the duty to disclose information which is material to the patentability of this application in accordance with Title 37, Code of Federal Regulations 1.56."

Allowable Subject Matter

8. Claims 1-40 are allowed.
9. The following is an examiner's statement of reasons for allowance: Claim 1 is an implantable medical device comprising a housing; a header coupled with the housing; and an antenna disposed within the header, wherein at least a portion of the antenna has a serpentine configuration. Claim 15 is a telemetry antenna for an implantable medical device comprising a header coupled to a body of the implantable medical device; the telemetry antenna disposed within a portion of the header and further including; a proximal end section having an antenna connector; a distal end opposite the proximal end section; a serpentine portion disposed between and forming a generally continuous antenna path between the proximal end section and the distal end, the serpentine portion including a plurality of first antenna segments interconnected in an alternating end-to-end configuration by a plurality of second antenna segments.

It is well known in the art of implantable medical devices to provide a housing including a header and antenna for telemetry purposes. It was however neither explicitly taught nor obvious to one of ordinary skill in the art at the time the invention was made to provide an implantable medical device including an antenna with a serpentine, or rectilinear shaped, portion.

10. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah Malamud whose telephone number is (571) 272-2106. The examiner can normally be reached on Monday-Friday, 9.00am-5.30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Angela D. Sykes can be reached on (571) 272-4955. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
